SEATING FURNITURE

ATICON 751

EASY TO CARE FOR & FUNCTIONAL

- Sturdy steel tube frame, chrome-plated or polyamide-coated
- Plastic shell – easy to clean
- Concealed mounting shell
- Optional row connection & extendable

Hospitals, care facilities, but also medical practices and other institutions in the care sector place the highest demands on the durability and maintenance of furniture. We manufacture selected chair models from our Classic series with plastic shells especially for these areas of application. Thanks to their resistance to cleaning agents, they not only meet the highest hygiene standards, but are also reliable in use even under heavy loads. Our plastic shell chairs are real eye-catchers. They are available in a total of eleven colours – from plain grey to bright lemon yellow.

Hiller

DIMENSIONS

- Total height: 870 mm
- Total width without armrest: 520 mm
- Total width with armrest: 520 mm
- Total depth: 470 - 490 mm
- Seat height: 460 - 470 mm

SEATING FURNITURE
